Art Unit: 3643

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Bankert et al. (5,258,209).

The sealed bell enclosure 12 of Bankert et al. can be formed from transparent plastic. Light would refract through the liquid contained within the Bankert et al. bell and, hence, repel insects such as flies.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Thomas Jr. (2,949,882). Light would refract through the water 16 contained within the plastic bag 10 of Thomas Jr.

The disclosure is objected to because of the following informalities: The detailed description of the invention comprising page 4 should be amended to incorporate the reference numerals of the drawing.

Appropriate correction is required.

The patents to Jasperson (5,749,799), Liao (6,117,502), and Fine et al. (US 6,438,878 B1) have been cited to provide additional examples of liquid-filled containers.
